| Condensers for. (P) Herman. (vii, 1888).....                                                                            | 845                  |
| Constitution of the Phthalic. (Noiting.) (v, 1886).....                                                                 | 27                   |
| Consumed in Discharging Indigo Prints. (Langmann.) (v, 1886).....                                                       | 482                  |
| Conversion of Fatty, into Soda Soap and Potash Soap. (Wright and Thompson.) (iv, 1885).....                             | 626                  |
| Converting Petroleum into. (P) Murray. From Schaal. (iv, 1885).....                                                     | 679                  |
| Corrosion of Nickel Cooking Vessels by Organic. (Rohde.) (ix, 1890).....                                                | 92                   |
| Crystallisation of. (P) Garton and Lawrence. (ix, 1890).....                                                            | 727                  |
| Detection of Mineral, in Presence of Organic. (Nickel.) (xiii, 1894).....                                               | 423                  |
| Detection of Mineral, in Vinegar. (Griggi.) (xiii, 1894).....                                                           | 423                  |
| Determ. of Affinities of. (Kastle and Keiser.) (xiv, 1895).....                                                         | 688                  |
| Determination of Organic. (Grosjean.) (ii, 1883).....                                                                   | 342                  |
| Difficult Solubility of Pure Zinc in. (Weeren.) (x, 1891).....                                                          | 955                  |
| Discussion on Raising. (vi, 1887).....                                                                                  | 243                  |
| Drying Unsaturated, in Fats and Oils. (Hazura.) (vii, 1888).....                                                        | 219                  |
| Electrolysis of, Change in Retort Carbon when used in the. (D-bray and Pechard.) (vi, 1887).....                        | 673                  |
| Estim. of Free HCl in Organic. (Bedson.) (xii, 1893).....                                                               | 119                  |
| Estimation of Free, in Butter. (Besarra.) (x, 1891).....                                                                | 800                  |
| Estimation of Insoluble Non-Volatile Fatty. (Meillere.) (xiii, 1894).....                                               | 983                  |
| Extraction of Pure, from Alkaline Salts. (P) Placet and Bonnet. (xiii, 1894).....                                       | 37                   |
| Fatty, and Glycerin from Fats and Oils. (P) Lewkowitsch. (viii, 1889).....                                              | 200                  |
| Fatty, for Manuf. of Soap, Prep. of. (Hartmann.) (ii, 1883).....                                                        | 479                  |
| Fatty, in Glycerin. (Sulman and Berry.) (v, 1886).....                                                                  | 177                  |
| Fatty, in Soap. (Schnaible.) (x, 1891).....                                                                             | 277                  |
| Fatty, of Drying Oils. (Hazura.) (viii, 1889).....                                                                      | 806                  |
| Formation of Organic, in the Beet. (Lepay.) (viii, 1889).....                                                           | 631                  |
| Formed during Malting Barley, Boiling Wort, &c. (Prior.) (xiv, 1895).....                                               | 672                  |
| Free Fatty, in Oils and Fats. (Noerdlinger.) (viii, 1889).....                                                          | 806                  |
| Free, in Wine. (Kayser.) (i, 1882).....                                                                                 | 115                  |
| From Beetroot Juice, Organic. (von Lippmann.) (xi, 1892).....                                                           | 50                   |
| Gas Volumetric Estim. of Organic. (Kux.) (xii, 1893).....                                                               | 713                  |
| Glass Retorts for Concentration of. (P) Webb. (x, 1891).....                                                            | 1007                 |
| In Oils, Estimation of Free. (Richter.) (ii, 1883).....                                                                 | 480                  |
| In Soap, Estimation of Fatty. (Schulze.) (vi, 1887).....                                                                | 359                  |
| In Wine, Estimation of Fixed Organic. (Schmitt and Hepe.) (ii, 1883).....                                               | 355                  |
| In Wines, Determ. of Volatile. (Buckner.) (xiv, 1895).....                                                              | 830                  |
| Indicators for. (Langbeck.) (i, 1882).....                                                                              | 245                  |
| Indicators for Determ. Basicity of Polybasic. (Engel.) (v, 1886).....                                                   | 392                  |
| Influence of Organic, on Alcoholic Fermentation. (Lafar.) (xiv, 1895).....                                              | 1054                 |
| Iron Vessel for Holding. (P) Pohl. (iv, 1885).....                                                                      | 497                  |
| Manuf. of Compounds of Iron with Fatty. (P) Huntington.) (xii, 1894).....                                               | 746                  |
| Manufacture of Monobasic and Dibasic, and Anhydrides of the latter. (P) Abel. From Haarman and Reimer. (xii, 1893)..... | 948                  |
| Methods of Determ. Free, in Oils. (Holde.) (ix, 1890).....                                                              | 112                  |
| Mineral, Method of Quickly Detect. in Vinegar. (Chiappe.) (i, 1882).....                                                | 160                  |
| Mixing Liquid, and Dry Powders for Disinfecting. (P) Urquhart. (iv, 1885).....                                          | 134                  |
| Of Beeswax, Extraction of Free. (Marie.) (xiii, 1894).....                                                              | 1207                 |
| Of Low Carbon Percentage in Baku Petroleum. (Ascham.) (ix, 1890), 597; (x, 1891), 907; (xii, 1893), 349                 |                      |
| Of Palm Oil, Solid Fatty. (Noerdlinger.) (xi, 1892).....                                                                | 445                  |
| Of the Pyridine Series, Synthesis of Alcohol. (Eihsorn.) (ix, 1890).....                                                | 644                  |
| Of the Sugar Group. (Fischer.) (ix, 1890).....                                                                          | 1052                 |
